

DATA DISTRIBUTION AGREEMENT OF BME MARKET DATA

Annex 4: Fees

July 1st, 2025

A) General Provisions

The applicable fees detailed in this Annex include references to usage type, Customer Categories and Units of Count.

BMEMD provides its Information Products and services separately from additional services.

The below fees may be automatically increased at the start of each calendar year in proportion to the percentage change in the Spanish Consumer Price Index (Índice de Precios al Consumo).

The automatic annual revision related to application of the Spanish Consumer Price Index abovementioned shall not be considered as an amendment to the fees applicable to this Agreement.

B) Customer Categories

Different Customer Categories may derive an inherent and differential value from the data used compared to other Customer Categories due to different scope and scale of the data used or to the usage made. In line with Commission Delegated Regulation (EU) 2017/567 provisions on the obligation to provide market data on a non-discriminatory basis, Customers falling within different Categories will be subject to different conditions, while those falling within the same Category shall be subject to same conditions.

In accordance with the ESMA Guidelines on the MiFID II/MiFIR obligations on market data, BMEMD takes into consideration the Use of the Licensed Data made by the Contracting Party in determining its Customer Categories.

The aforementioned uses are as follows:

- Display Usage of the Licensed Data.
- Non Display Data Usage for the Creation of Second Generation Products.
- Data for Non-Display Usage for Trading Applications.
- Other Non-Display Usage.
- Non Display Data Usage to Feed Price Formation Mechanisms of Trading Systems.

Every combination of the above results in a single Customer Category.

Unless otherwise stated, fees applicable to every Customer Category are those resulting of the combination of the ones for the usages mentioned above according to this Annex.

C) Direct Connection Fee

The Direct Connection Fee shall be payable in advance on a quarterly basis by the Contracting Party who receives the Licensed Data via direct connection to BMEMD.

These fees are charged to all Customer Categories with Direct Connection to BMEMD unless otherwise stated in this Annex.

BMEMD offers three modalities of direct connection interface. The basic fee for each connection modality is as follows:

1.- SIX MDDX.

DIRECT CONNECTION FEE "SIX MDDX" (Annual)		
Connections Set (1 Connection Set = 1 user-id)		
1 st – 2 nd	3 rd - 4 th	≥ 5 th
27,783.6€/set (VAT ex)	16,670.16€/set (VAT ex)	11,113.44€/set (VAT ex)

This modality ("SIX MDDX") allows the reception, on a consolidated or individualized way per each source, of the products listed in the Catalogue of Information Products (Annex 3), in its UNICAST modality (i.e., TCP/IP ↔ user-id) as well as in its MULTICAST modality (UDP ↔ user-id).

For the 3rd and 4th Connections Set, it will be applied a discount of 40% to the applicable fee (27,783.6€/set) resulting to an applicable fee of 16,670.16€/set. For the 5th Connection Set and successive, it will be applied a discount of 60% to the basic fee (27,783.6€/set) resulting in an applicable fee of 11,113,44€/set.

2.- BME GATE SERVER.

Delayed Data is made available to the public in a machine readable format free of charge on BME website. The reception of Delayed Data through a Data Provider or for its commercial use requires the execution of the Data Distribution Agreement of BME Market Data and it is subject to the applicable fees.

The contents of all the products are included in the Annex 3: Information Products Catalogue.

E) Variable Fees

The variable fees shall be payable by the Contracting Party on a monthly basis and shall depend on the number of Access ID Codes and Per Quote Individual Requests ("quotes") with access to Real-Time Data per Device. Corresponding Variable Fee for Internal Users of the Contracting Party's Group are applicable.

These fees are charged to all Customer Categories that make a Display Usage of the Licensed Data.

(4) The End User complying with all the requirements under Special Case No. 1 (Annex 1 of the Data Distribution Agreement of BME Market Data) shall be deemed as Non-Professional Investor.

F) Fees Relating to Special Cases of the Data Usage

The Special Cases of the Data Usage are defined in Annex 1. The following fees apply per Device, as defined in Clause 1 of the General Conditions of the Data Distribution Agreement.

F.1 Non Display Data Usage for the Creation of Second Generation Products

The Non-Display Data Usage Fee for the Creation of Second Generation Products, which, according to Annex 1 Special Case No. 3, section i) is subject to the regime set forth in this Section F.1, shall be paid in advance on a quarterly basis by the Contracting Party.

Clients that make more than one usage of the Licensed Data within this Section will be charged 100% of the usage with the highest value (in terms of applicable fees) and an increment equivalent to 50% of each of the fees applicable to the rest of the data usages.

4	22,013.16
≥5	27,516.45

A Device subject to the License Fee for Non-Display Usage of Trading Applications which has embedded Other Non-Display Usages will not be subject to both fees.

F.3 Non Display Data Usage to Feed Price Formation Mechanisms of Trading Systems

The fees applicable to an Enterprise Agreement (“E.A.”) corresponding to Special Case No.5 will be established in accordance with the provisions set in Article 13 of Regulation (EU) No 600/2014 of the European Parliament and of the Council of 15 May 2014 on markets in financial instruments (MiFIR) and Article 8 of the Commission Delegated Regulation (EU) 2017/567.

In this sense, it should be taken into account that the Contracting Party is using the price formation generated at BME Group’s Trading Venues as an essential element for its own price formation system and, in addition, that prices formed at the Contracting Party’s trading system shall not be subject to intellectual property rights claims by BME Market Data.

In view of the previous paragraphs, the fees scheme for the determination of the E.A. shall be based on the value which the market data facilitated by BMEMD represents for the Contracting Party, taking into account the scope and scale of the trading activities that the Contracting Party performs, the number and relevance of the financial instruments for which BMEMD provides information and the turnover of such instruments.

Furthermore, it should be taken into account that, by feeding the price formation mechanism with BMEMD’s data stream, the Contracting Party can easily generate a data flow which might be marketed by the Contracting Party without limitations.

The categories of instruments to which basic fees apply are presented hereunder:

- Category A: shares admitted to trading on BME’s regulated markets and multilateral trading facilities, which are found among the 50 most liquid shares in the Eurozone.
- Category B: shares that are constituents of the IBEX 35 index and are not included in Category A.
- Category C: shares that are constituents of the IBEX Med Cap index.
- Category D: other shares admitted to trading on BME’s regulated markets and multilateral trading facilities.
- Category E: financial instruments similar to equity instruments other than shares admitted to trading on BME’s regulated markets and multilateral trading facilities.
